Early Childhood Health & Development FACT Sheet

What does it mean to be School Ready?

SCHOOL Readiness PROJECT

Health

- Primary Care Physician
- Regular Check-ups with PCP and Dentist
- Current Shots (Immunizations)
- Healthy Lifestyle Habits
  - Physical, Emotional, Cognitive, Spiritual
- Medical Home - A Team that supports all the aspects of your child's health and well-being!

School Readiness

- Support your child's interests
- Fill your home with books and other language materials
- Make time for your child to play and learn with you
- Have conversations with your child
- Give your child responsibilities and decision-making opportunities
- Complete the ASQ/ASQ-SE
- Share what it means to be part of a family

Development

Development is the process of learning and mastering skills during specific time periods. These guidelines or markers are called milestones. Development is assessed these areas:

- **Gross Motor** - large muscle movement, walking, jumping, balancing, etc.
- **Fine Motor**- small muscle movement, writing, grasping small objects, fastening clothing.
- **Communication** - verbal, non-verbal, expressive and receptive skills.
- **Problem-Solving** - Cause and effect, learn by imitation, trial and error
- **Personal-Social** - self-awareness, self-regulation and emotional development. These skills include the ability to pay attention, make transitions from one activity to another and cooperate with others.
- **Social-Emotional** - self-confidence, managing feelings, handling disappointment, empathy toward others, positive relationships, independence.

Leadership in Disabilities & Achievement of Hawai'i

School Readiness Program

Focused on nurturing and empowering young learners to thrive in their educational journey through early screening

OUR GOAL

To break down barriers and improve access to higher-quality early childhood services through early detection screenings, while providing quality programs to those referred through the process

WHO WE SERVE

We serve preschool students ages 0-5 across Hawai'i, Kaua'i, Lana'i, Maui, Moloka'i, and O'ahu. By offering developmental social emotional, hearing, and vision screenings.

CHILDHOOD SCREENINGS

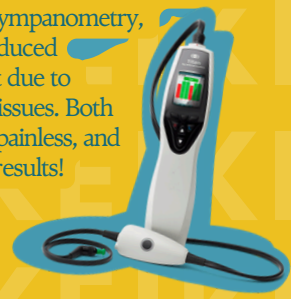

VISION

We use the Plusoptix Digital Vision Screener to check your child's eyes. It is an accurate, non-invasive method for detecting a variety of vision issues in children. The screening is quick and provides immediate results!

HEARING

Two methods are used to check your child's hearing. The first is Otoacoustic Emissions, which evaluates both the middle and inner ear. The second is Tympanometry, which checks for reduced eardrum movement due to fluid, wax, or other issues. Both methods are quick, painless, and provide immediate results!

DEVELOPMENTAL

Our qualified screeners use the Ages and Stages Questionnaire (ASQ-SE) for Social-Emotional development, and, if applicable, the ASQ-3, as assessment tools. These screenings help detect developmental concerns.

CASE MANAGEMENT

Case management is provided for families of children identified with specific needs through the screening process. Our staff will support you by explaining the screening results and offering next-step solutions. We will connect you with community resources and follow up on referrals made to other systems of care.
